

Optional Accessories

Part # 104485

Escutcheon

! CAUTION INSTALLER:

Refer to Installation, Operation, and Maintenance Manual for Linear Steam Head Residential Model 104480, PUR103936" for installation of Linear Steam Head, 104480, prior installation of any optional accessories.

! CAUTION

Because the steam head, Escutcheon and direct steam emission are very hot, locate the steam head and Escutcheon where incidental contact by bather with the steam head, Faceplate or direct steam emission cannot occur.

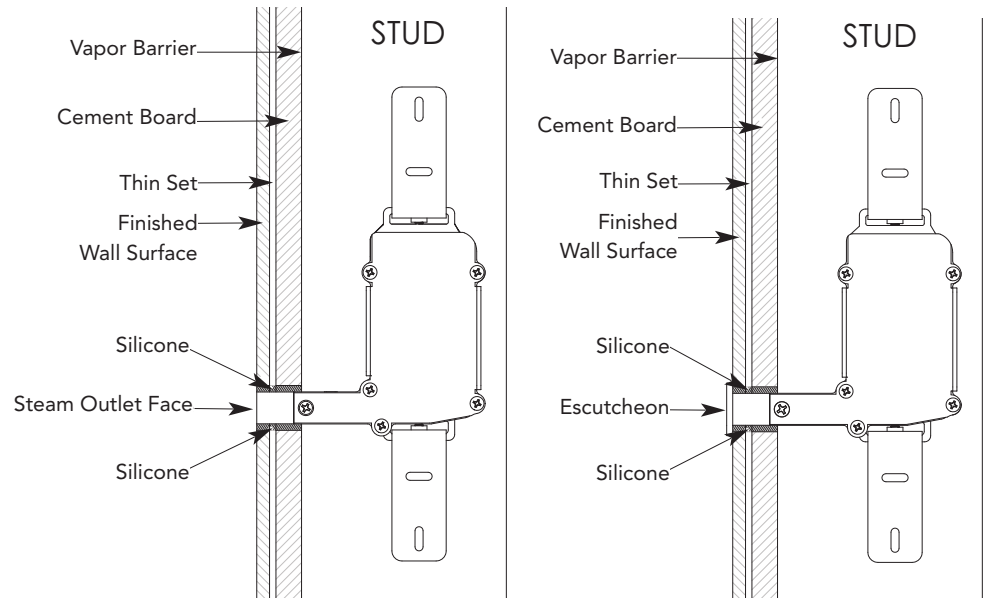

Figure 1

Escutcheon Escutcheon is a decorative accessory and is available in (8) finishes. It's larger than Linear Steam Head's standard Faceplate and it's manufactured in solid brass.

Installation Instruction

- Apply silicone to the front surface of Linear Steam Head. (see fig 2).
- Secure the faceplate as required until the silicone sets.
- Apply silicone into the gap between the faceplate and the wall materials as required to create a moisture seal, (see fig. 3).

! CAUTION Failure to properly install Escutcheon may result in a leak within the wall cavity and cause problems associated with leaks, moisture and property damage from leaks.

Optional Accessories

Part # 104486

Finished Diverter

CAUTION Because direct steam is very hot, the diverter will be hot during the steam session, and will remain hot for a period of time after steam session. Never install, remove or adjust a diverter when the steam head is hot or if steam generator is turned on. Installing, removing or adjusting when the steam head is hot or if the steam generator is turned on may cause a burn hazard and personal injury.

Finished Diverter is an optional addition to the subtle and elegant Linear Steam Head, where steam emission zone is an issue. Finished Diverter effortlessly direct steam up the finished wall, greatly reduce the size of steam emission zone. It comes in 8 beautiful finishes to blend seamlessly with any bathroom décor and it's manufactured in solid brass.

Installation Instruction

- Securely press the two rubber extensions into the opening of Linear Steam Head's Fae Plate or Escutcheon and push in firmly until the diverter is securely in place.
